Enosh, apprentice to one of the richest merchants in the Kag, is secretly heir to a broken line of mages. Because of The Empire of Dageis' quest for sources of the agan—the life-source that mages use for power—his people have been reduced to scavengers, his culture diminished to a speck in the wind.

For more than ten years, he has helped raise a conjured beast to use as a weapon against the Dageians. But Enosh's plans are falling apart.

A powerful enemy has escaped and Enosh needs to capture him before he reaches Dageis. His quest is further complicated after he finds himself used as a pawn by Gasparian nobles. On the other end of the continent, Sume, daughter to a Jin-Sayeng hero, must return to her roots to save her country and bring honour to her father's name. To do this, she must befriend a prince and understand the terrible, corrupting nature of power and the reason her father was driven to walk away from it all those years ago... Meanwhile, Kefier, Enosh's agan-blind brother, is forced back into a life of violence. As he struggles with the notion that hands, once bloodied, never stay clean for long, he finds himself occupied with an unexpected burden: his own brother's daughter.
