If you think living with one foot in the streets and the other in the business world is simple, just ask Tyrone Philpott. A self-made hustler from rural Virginia, Tyrone is on an intense paper chase that threatens to take away what he cherishes most; life with his soon-to-be baby's mother, Telina. Well aware that he's playing with fire, Tyrone knows he has to give up a big part of his hustle in order to save his struggling relationship, but that union takes a backseat when he realizes what he wanted all along was right in front of him. Tina, Tyrone's sexy and sassy side-piece, is a round-the-way girl who has no problem keeping her mouth closed about a few secrets that could disrupt Tyrone's life and open up a few doors for her.

With all the baby's momma drama, Tina pushing her way into his heart, and his hustle being cut short, you'd assume Tyrone was being pushed hard enough. Yet it wasn't until that last nudge that he decided to go forward by taking a step back and handing over the reins to his protégé. It's then that The Left Lane hits a winding curve.
