One night. One divorce. One too many drinks and a very hot man make a bad combination. It was only meant to be one night to celebrate my long needed divorce, but when I find out that I'm pregnant by the hot man I met that night, it turns out I'm not as free as I wanted. When I finally manage to track down my hot one night stand, it's to find he lives with his three other friends and he works as a stripper. Not what I was expecting. When Ellie's past causes complications and everything is falling apart, will the four men she falls in love with be able to protect her? **\*\*Reverse harem & 18+\*\*** (This was sold as a 5 part serial and this is the combined version)
